One letter of recommendation

International students: TOEFL or IELTS scores

A professional resume

Response to one essay question

International students: proof of financial support

Official GMAT or GRE score report

Pelayo Méndez,
MSF Class of 2016

“The MS in Finance faculty is really a very, very knowledgeable group of teachers that are leading finance in the educational field as well as in the outside world. Several of them sit on the board of directors of companies, several of them own their businesses, and that is making sure that you are being taught by people in finance who have the outside knowledge.”

UNDERGRADUATE:
London School of Economics

EMPLOYER:
Mattel, Inc.

**CUSTOM CURRICULUM.
SOPHISTICATED COMPETENCIES.
ACCELERATED FULFILLMENT.**
Curriculum:
36 total units: 27 core, 9 elective

MORE ABOUT THE CURRICULUM AND PROGRAM:

The USC Marshall Master of Science in Finance Program (MSF) provides a fast-track to young professionals passionate about beginning a career in the finance industry. Although young, our MS in Finance has already distinguished itself amongst similar programs at top business schools nationwide.

Our 1-year accelerated program builds a comprehensive foundation in finance and provides flexibility to pursue individual interests.

What makes MSF students stand apart is their deeper technical and practical understanding of finance. Equipped with necessary skills and knowledge, our students are ready to make an immediate impact as analysts within the various realms of finance. Our students come from varied backgrounds and demonstrate global, ethnic, and socioeconomic diversity.

“I did my undergraduate degree in industrial and systems engineering and had done a number of internships in different industries prior to my graduate studies. One that I really fell in love with was my internship in equity trading. I learned so much there! However, I also learned that there are a lot of financial concepts and financial skills that I hadn’t learned in my undergraduate engineering. Enrolling in a program specialized in finance enabled me to get those skills. I’m so glad I did! I’ve learned concepts that I felt I had been missing.”

Katherine Breiding,
MSF Class of 2016

UNDERGRADUATE:
USC Viterbi School of Engineering

EMPLOYER:
Goldman Sachs

“Overall the general breadth of the whole curriculum is the programs greatest asset. The wide variety of electives helped me specialize in my own particular interest, and ultimately that helped me develop a well-rounded perspective on not only what finance is but also a particular aspect of it.”

Kimberly Su,
MSF Class of 2015
